

# Ordering a 36-String Roma Rosa Harp

Updated: March 7, 2024

*Frequently asked questions...*

***What comes with the 36-String Roma Rosa Harp?***

The **36-Roma Rosa Harp** starts at a Low B (see range chart below) and goes to a high “b” and is 63” tall, 19” wide, 31” deep, and is 40 to 50 lbs (depending on your wood selection). This harp has an amazing volume and resonance to it. We give a set of nylon strings (does not include the low special strings) and a tuning wrench. More on strings below.

**Shown, left, in natural cherry with a semi-gloss finish.**

**Shown, right, in exotic Padauk with a high-gloss finish.**

**See order form for prices.**

***What woods are used to make this harp?***

Our harps are made of walnut, cherry, or exotic woods like: Padauk, African Mahogany, Figured Walnut, or Figured Maple. We can use a semi-gloss or high-gloss finish (but we charge extra for high-gloss).

The **Roma Rosa Harp** comes automatically with a carved “rosebud” top (see picture on left in exotic Padauk wood with a high-gloss finish), unless you request a more rounded top like our Roma Bella (see pictured on right in walnut with a high-gloss finish). The rounded top is less labor, so we would charge less.

**See order form for prices.**

*What kinds of levers are available for this harp?*

**Top: Gold Truitt Levers  
Bottom: Gold Forte Levers**

**Top: Gold Camac Levers  
Bottom: Silver Camacs**

**Silver Rees Levers**

**Note: You can get a full set of levers or partial (such as C+F's or C,F+B) For prices see order form.**

*Can I get a padded case for this harp?*

You can purchase a special padded case from us. We have three different companies that have our patterns. Check with us first to see if we have one in stock. If we don't have the color you want, then we can either order it or direct you to one of our three case makers. The picture above shows the "one-piece" case (which has a special pocket on the bottom to slip in a wheel cart. Ask about our "two-piece" case (which makes loading the harp into the case easier).

*Can I add a Mic Pick-up?*

Yes, for an extra fee we can add a mic pick-up which includes K&K Big-Twin transducers added to the inside of the sound board, and a metal jack on either the right or left side (bottom) of the harp.

***Where can I get extra strings for this harp?***

We will give you an extra set of regular nylon strings along with a tuning wrench. If you would like an extra set of the special low wound strings, they can be purchased directly from us.

**ENO ET-3000A Electronic Tuner**

If you want to change the frequency from 440 to 432 or something different, then you'd want to get this model (shown left), so that you can change it with the arrow buttons.

Another option is to download the "Piano Tuner" app on your cell phone (which works well if you're in a quiet room by yourself).

***How do you receive payment?***

Since we are a small family business, we take credit cards only through PayPal for small harps (the PayPal service fee is added to your total). For this type of harp, our U.S. customers send us either a personal check or a bank money order made payable to Marini Made Harps. For international customers, after your order is confirmed we would email you our special bank information for payment directly to our special account that we have set up for this (a small bank fee is added to your total). So, first you would email us your request with the order form filled out, and then we will email you back an invoice with everything listed and a final total. Once this is done, then we would proceed with your harp order. If the harp you want is available, then we would ship the harp to you once we receive payment. If we still need to make the harp, then we will notify you about 1 to 2 weeks before construction begins so that you can mail (or wire) us your payment.

Thank you for your interest in our Roma Rosa Harp... we hope that we can serve you!
